OPSI | Observatory of Public Sector Innovation

Observatory for Public Sector Innovation (OPSI):
2019 Call for Innovations

Visit here for more details and to access the online submission form: LINK

The third, annual global OECD-MBRCGI Call for Innovations is officially open! We're looking for public sector innovations that are:

.

Novel   Implemented   Impactful

Come to Paris and Dubai

Submit a case to show us the major trends shaping public sector innovation. Exemplary cases will be included in the *Embracing Innovation: Global Trends Report,* of which a special few will then be selected to present at the OPSI innovation conference in November 2018 (Paris) and at the *Edge of Government* exhibition, as part of the *World Government Summit* in February 2019 (Dubai). Featured innovations at the *Edge of Government* exhibition are eligible for the prestigious *Edge of Government* award.

Take the pulse of public sector innovation

What are the big issues? What new paths are civil servants forging? Your innovation will show us what the cutting-edge of innovation looks like in the public sector.

Elevate your work to an international audience

Cases will also be curated on OPSI's innovation case study platform, to showcase your organisation's great work to inspire and influence other innovators.

Observatory for Public Sector Innovation (OPSI):
2019 Call for Innovations

Who we are

The Observatory for Public Sector Innovation (OPSI) is a global forum for public sector innovation. Since 2013, OPSI has built a strong reputation in global trends, sustainable development goals, transformative technology impact, public sector innovation systems, and innovation skills, processes and methods. OPSI connects and convenes innovators world-wide and directly advises leaders of public sector innovation in OECD member countries and beyond.

About the Mohammed Bin Rashid Centre for Government Innovation

The Mohammed Bin Rashid Centre for Government Innovation stimulates and enriches the culture of innovation within the government sector through the development of an integrated innovation framework, so that innovation is a key pillar of the UAE government.

About the Embracing Innovation Report series

Now in its third year, the 'Embracing Innovation' report series is an annual report which draws on extensive research and a global Call for Innovations crowdsourcing exercise that surfaces hundreds of innovation initiatives from around the world. From these, the report deduces and analyses major innovation trends and illustrates them with select, in-depth case studies.

Quick facts:

- *Last year the "Call for Innovations" received 276 submissions from 58 countries.*

- *10 case studies were chosen and featured within the 2018 "Embracing Innovation in Government" report.*

- *Two case studies from last year's call were presented at the 2018 World Government Summit in Dubai.*

- *The World Government Summit brings together over 130 countries and 4 000 people to discuss innovative ways to solve the challenges facing humanity*

- *Innovations from last year were focussed on the following areas: identity, system approach and enablers, and inclusiveness and vulnerable populations.*
