

TOP 5 ACHIEVEMENTS

1

scaled the use of digital anti-corruption tools to city councils, state enterprises, controlling and prosecution institutions. DOZORRO increased engagement of business in public tenders and NGOs to control of procurements

2

pioneered a robust methodology for in-depth investigations into risky tenders based on machine learning starting from the tender planning stage. DOZORRO shifted the anti-corruption paradigm in public procurement from the reactive mode to the preventive mode

3

advocated for a risk-oriented monitoring approach as the basis for the Law of Procurement monitoring in Ukraine and obligatory to use by the State Audit Service

4

listed in top 12 projects – “stars of reforms” – worldwide for engaging citizens as corruption watchdog by Open Government Partnership

5

uses open-source tools which make the system highly replicable elsewhere in Ukraine and beyond

DOZORRO

civic monitoring of the public procurement
run by Transparency International Ukraine

our goal is to unite the civil society, to ensure
equal rules for all stakeholders of the
procurement system

we provide relevant expertise and deploy
technical solutions enabling anyone – supplier,
procuring entity, controlling agency or citizen –
to identify, react and report wrongdoings in
public spendings since November 2016

WE RUN

online platform dozorro.org

intelligence
tools bi.prozorro.org
 bipro.prozorro.org

community
of 25 NGOs DOZORRO unwrapped
 civic monitoring of public
 procurement across 10
 regions uniting community
 of 150 members across
 Ukraine

WEB-PLATFORM

end-to-end feedback platform
for bidders and procuring entities
that allows reporting cases of
corruption, restriction of
competition or deliberate
mismanagement

profiling of the companies and
buyers displaying their previous
contracting practice and
responsiveness to complaints

easy-to-use knowledge hub with
guidance on how to identify and
appeal risky tenders to controlling
bodies (Anti-Monopoly
Committee, the State Audit
Service)

media hub giving voice to local
investigative stories

source of structured feedback
allowing to track results of the
controlling bodies review

INTELLIGENCE TOOLS

designed to increase the efficiency of public
procurement and foster procuring entities to
deliver a greater value for money

RISK- INDICATORS

the risk-accessment tool powered by artificial
intelligence which helps to detect public
tenders with high probability of violations ("red
flags system")
