

The background is a map of Chicago, Illinois, showing various neighborhoods and streets. Overlaid on the map is a large yellow lightbulb icon. Inside the lightbulb is a black silhouette of the Chicago skyline, featuring prominent skyscrapers like the Willis Tower. The map is covered with numerous small green dots of varying sizes, representing data points or 'heat spots'. The text 'PoliVisu' is centered over the lightbulb.

PoliVisu transforms the long and laborious process of policy making by making it easier for politicians and city managers to collaborate with each other and with citizens.

The use of geo data for **advanced policy visualisations** allows everyone to better understand the context of city challenges and enables collaborative working to find a solution.
