Service Offer

techDetector Workshops

We offer a range of workshops and presentations on the intersection of new technologies and development cooperation to GIZ projects, sector networks, clusters and country offices. These range from introductions to specific technology domains to impact assessments and idea development formats.

All workshops can be customized and flexibly integrated into the implementation phase of existing projects as well as into the planning process for new GIZ projects.

Workshop

techIdeation

Objective

Assess emerging technologies for their potential use in a given field or context and develop ideas for specific measures.

Target group

4 – 12 experts from a specific sector or project in need of developing ideas for future-proof support measures.

Output

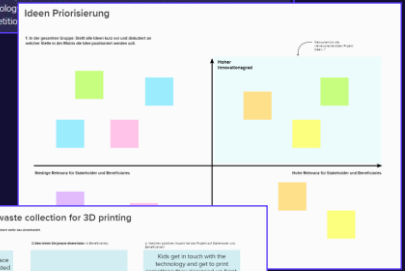

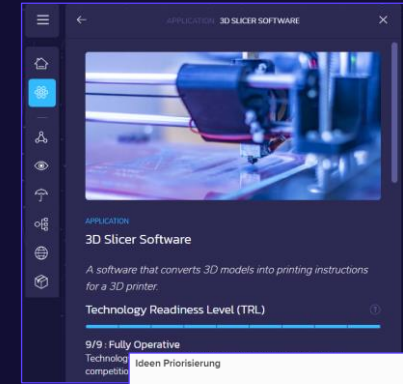

Number of idea sketches specific to the given challenges & opportunities that incorporate emerging technologies

Content

Interactive workshop with a mix of research, ideation, assessment & enrichment in plenary and sub-groups.

Each workshop is customized according to the given topics and requirements.

Idea Sketch: Plastic waste collection for 3D printing

Free workshops in makerspace where 3D printing can be tested & experienced. As printing material (plastic waste in form of spool) is collected up front in nature.

Street kids

Get kids in touch with this modern technology

KG of plastic waste collected per session

Number of participating kids

Gemeinsame Maßnahme von Vorhaben "Bekämpfung Jugendmissetat" und "Umwelt & Naturschutz"

techPerspectives

Objective

Learn about a specific technology domain and scout for current & future applications in a specific sector.

Output

Participants gained a deeper understanding of the specific technology domain and applications in their sector.

Target Group and Setup

- 3-12 people from a specific sector or project
- Duration 1.5 - 2h, virtual or presence

Content

- Input provided by internal or external expert
- Exploration of specific applications in groups
- Guided discussion on possible applications in sector and project

Each workshop will be customized. This workshop can be extended to prepare statements for position papers on specific technology domains. In addition, service can be provided to draft position papers or insight reports.

techImpact

Objective

Enhance critical thinking by engaging discussions around emerging technology's risks and opportunities

Target Group and Setup

- 4–15 people from a specific sector or project
- Duration: min. 3 hrs, virtual or presence

Output

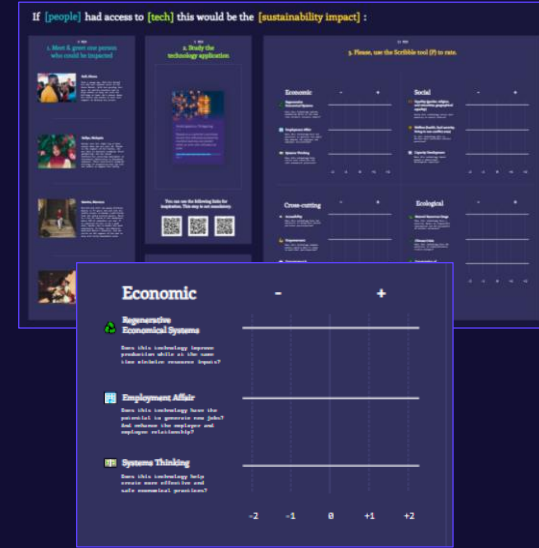

Technology applications assessed concerning their potential impact

Identified risks & opportunities of technologies for further investigation

Content

- Input on technology domain & applications
- Individual research on applications
- Assess in groups, impact, risks & opportunities
- Joint discussion on outcomes

Each workshop will be customized according to the given topics and requirements. Rating criteria This workshop-format can also have a special focus on gender.

Workshop

techJourney

Objective

Discover potential future challenges for a specific field of action and explore how to respond using new technologies

Output

Tailor-made future scenario and list of relevant technology applications

Possible solutions for improved innovation capacity

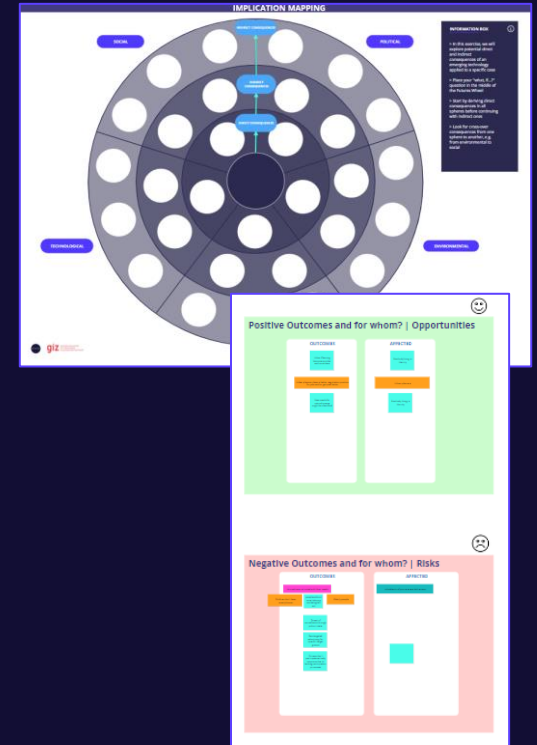

Target Group and Setup

- 4–12 people from a specific sector or project
- Duration 3 – 6 hrs, virtual or presence

Content

- Immersion into challenging future scenarios
- Developing a storyline in groups on possible interventions addressing the challenges

Each workshop will be customized according to the given topics and requirements. Optionally, based on the discussion and further research, an insights report can be created as a follow-up to the workshop.
